The 4<sup>th</sup> International Conference in Transparency & Architecture -ICTA2016- will be held at Thessaloniki from 02 - 04 November 2016 at School of Architecture, Aristotle University of Thessaloniki, Greece.

Emerging Complexities follows the success of the 2001 Fills and Voids; 2006 Boundaries and Challenges and the 2007 Challenging the Limits events held in Thessaloniki. This year, the 4<sup>th</sup> International Conference in Transparency and Architecture launches a thematic research of Transparency's perceptual, notional, materialistic and structural properties.

Emerging Complexities tackles diverse architectural aspects from a variety of perspectives, from design and strategic explorations to method and tool related issues, fostering strong relationships between material and immaterial dimensions.
