Co - Founder of GUPHA (Global University Programs in Healthcare Architecture)

20 October 2015

Subject: 4th International Conference in Architecture and Transparency

The Aristotle University of Thessaloniki, School of Architecture and the Department of Architecture Design and Technology are proud to announce the launch of the 4th International Conference in Architecture and Transparency to be held in Thessaloniki (ICTA2016), Greece from 02 – 04 November 2016.

ICTA 2016 will explore the contemporary responds of architecture research and practice to the increasing heterogeneity behind the interaction of transparency with the abstract and the physical. We welcome papers, posters, workshops and doctoral colloquium submissions from any field of architecture design or other creative subjects that focus on theoretical or practical investigations of revealing the complexity behind the material and immaterial variations of transparency (e.g., trans-disciplinary applications, structures, building elements and their luminosity, opacity etc.), on the conceptual relations and methodological challenges of its origin and impact (e.g., as mediated mechanism, as disrupting presence or precondition for simultaneous perceptions), and on trans-disciplinary examples and implementations of its persuasive effects in design innovations.

The ICTA2016 Organizing Committee would be very pleased if you consider our proposal to join the Review Committee of the forthcoming event and help us make this conference a success. In case your schedule allows you to be a "abstracts and papers" reviewer (expect to receive 3-6 papers for blind review in autumn according to our planned program) please send us a notification email at icta2016@arch.auth.gr. The Organizing Committee depends heavily on your valuable contribution for the successful organization of the 4th International Conference in Architecture and Transparency.

For more please visit http://icta2016.web.auth.gr/ or contact us at icta2016@arch.auth.gr
We appreciate your time and consideration and also your help to share the event across your networks!

Best regards

ICTA2016 Organizing Committee

For the organizing committee

Yours sincerely,

Dr Fani Vavili
Professor of Architectural Design
